SUMMARY

I am a developer early in my career looking to challenge myself in a company where I can work with talented people and build awesome products. I have a creative and bubbly personality, an eagerness to learn and a passion for professional and personal growth. My background in Fine Arts taught me how to tailor my products based on client needs as well as adhering to negotiated deadlines. I love getting fully invested in something that I'm passionate about, and I find it incredibly rewarding when the hard work pays off.

SKILLS & TECHNOLOGIES

- Styling using HTML5 and CSS3, Handlebars
